Dentistry  
Society

ACADEMY  
OF DIGITAL  
DENTISTRY

An Indian Dental Association Initiative

# INTERNATIONAL DIGITAL DENTISTRY CONGRESS

## 2023

Digital dentistry has transformed the way dental care is delivered. It has revolutionized imaging, treatment planning, restoration fabrication, patient communication, and collaboration among dental professionals. With its precise and efficient workflow, digital dentistry offers enhanced diagnostic capabilities, improved treatment outcomes, and a more seamless patient experience.

As technology continues to evolve, we at IDA realise that the future of digital dentistry holds even greater possibilities for advancement. Realising this dream the Indian Dental Association partnered with the Digital Dentistry Society – International, the leading scientific body in the subject of Digital Dentistry to collaborate for the first International Digital Dentistry Congress on the 10-11 June 2023 at the Jasmine Hall at the Jio World Convention centre in Mumbai.

The First Edition of the International Digital Dentistry Congress, was truly an impactful one.

It was an extravagant affair featuring 88 speakers who deliberated and presented excellent scientific information in 54 sessions. There were 4678 delegates present at the congress.

The Industry too was well represented with 60 companies and 132 stalls.
